

Course Outline For: Confined Space Entry for Construction **Online Training Course**

Per OSHA 1926.1207 and ANSI/ASSE Z117.1-2009

Overview

Compliance Solutions offers the most complete, comprehensive online confined space entry training course available in the industry today! Our online course *meets or exceeds OSHA and ANSI standards* for confined space training programs for the **construction industry**. See for yourself why our training surpasses the competition for quality and completeness.

This self-paced, online course was developed to provide students the opportunity to gain knowledge and comprehension regarding confined space safe entry by following government regulations and nationally recognized safe industry practices for the construction industry.

By complying with federal regulations and following nationally recognized safe industry practices concerning confined spaces, employers and workers alike will help reduce and prevent the risks confined spaces pose to workers including serious injury, illness, or death.

In this course, you'll learn:

- How OSHA's new confined space regulations affect construction workers, and the pitfalls surrounding proper designation of work spaces
- How the type of work conducted determines which regulations (general industry or construction) OSHA will use and how that affects the worker and employer
- OSHA's focus on multi-employer worksites, how OSHA *expects* employers to manage these sites and what training employees *must* have for entering confined spaces on multi-employer sites
- How existing and potential confined space hazards can negatively affect worker safety and health
- How precautionary and preventative measures can be taken to help protect workers from some of the most common confined space hazards
-and much, much more!

Compliance with OSHA regulations and other industry standards also affects your organization's financial risk due to audit findings, fines, litigation, and insurance costs. Help protect yourself, your workers, and your organization by registering for this training today.

Who should take this course?

Employees in the construction industry who perform construction work in or around confined spaces, or provide direct support to those who enter confined spaces. Individuals who are certified or pursuing certification in other areas of Environmental Health and Safety (EHS), such as HAZWOPER, Hydrogen Sulfide Awareness, and Emergency Response will also benefit from this course.

Learning Outcomes

After completing this course, participants will be able to:

- Recognize common confined space hazards
- Name the potential causes of common confined space hazards
- Identify ways of addressing potential confined space hazards
- Describe how to prepare for confined space emergencies, including rescue

Course Length

This course takes approximately 4 hours to complete.

Course Outline For: Confined Space Entry for Construction **Online Training Course**

Per OSHA 1926.1207 and ANSI/ASSE Z117.1-2009

What topics are covered in this course?

- Properties and characteristics of confined spaces
- Sources of confined space hazards
- Confined space standards and regulations
- Detecting confined space hazards
- OSHA Focus Four Hazards
- Monitoring devices
- Personal protective equipment
- Respiratory protection
- Multi-employer worksites
- Controlling confined space hazards
- Confined space rescue and response

Site-Specific Hands-On Training

Since it is impossible to identify every situation where confined spaces might be present, this training course was designed to complement an employer's site-specific training. This course should be augmented by employer-provided site-specific, hands-on training.

Employers are responsible for providing training specific to all of the site hazards, health hazards, and safety requirements you may encounter at worksites that fall within the scope of the employer's operations.

Instructor Support

Compliance Solutions provides for online interaction with an Instructor and the opportunity for students to ask questions and receive help through ComplyChat® a proprietary asynchronous instructor chat system during normal business hours. We also offer email support to address questions that are not urgent or received after hours

Compliance Solutions began offering occupational safety training in 1995, providing qualified instructors at quality seminars. We understand what employers and students *need* to retain from EHS training. We take pride in delivering training that doesn't just *meet* OSHA requirements, we *exceed* them! Find out why our students say: "Compliance Solutions puts the class back in online training!"

Prerequisites

There are no prerequisites assigned to this course.

Registration

Register online at www.csregs.com, or call 1-800-711-2706 Ext 1.

Discounts

For companies wishing to register multiple students, the following discounts are available:

- 10% discount for 5-10 licenses
- 15% discount for 11-20 licenses
- 25% discount for 21-50 licenses
- 45% discount for 51-100 licenses
- Call for preferred discounts for over 101 licenses!

To take advantage of the above discounts, **please contact us at 1-800-711-2706 Ext 1 before registering.** We will issue your company a block of licenses for students to use during the registration process.
